

## Project Development Phase

### Delivery of Sprint-4

Team ID	PNT2022TMID26062
Project Name	Smart Farmer-IOT Enabled Smart FarmingApplication

In Sprint-4 we are going to make the user interact with Software.

**Step-1:** First user need to download the android APK file from MIT app inventor where we developed our mobile application and install in their mobiles.

**Step-2:** After successful installation we can find app icon in our mobile as shown below.

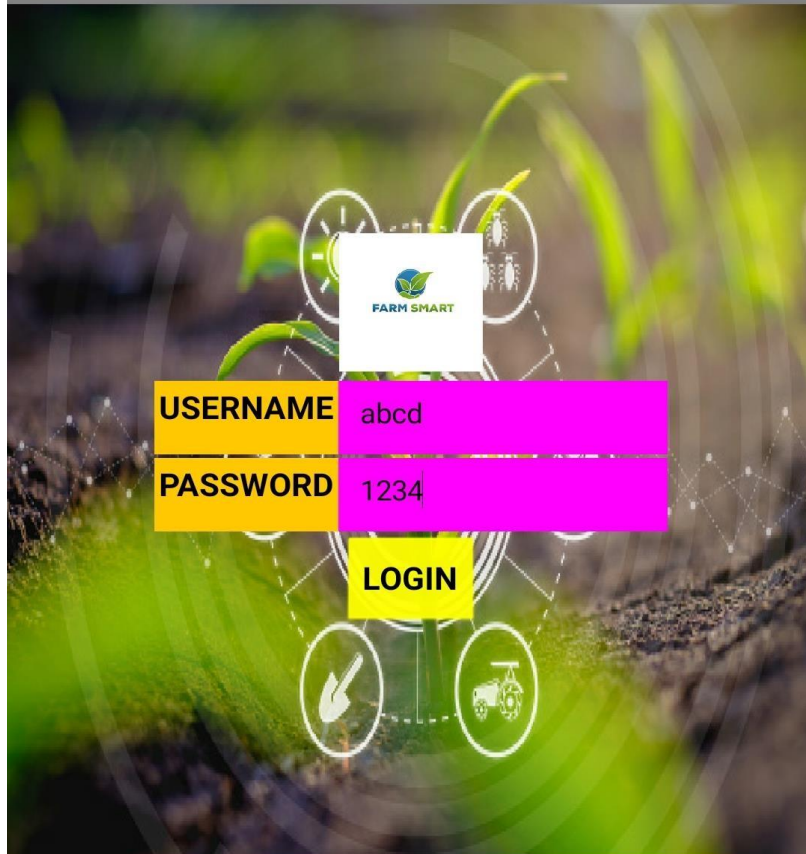

**Step-3:** After clicking the app icon enter username and password. The user can see interface like these as shown below.

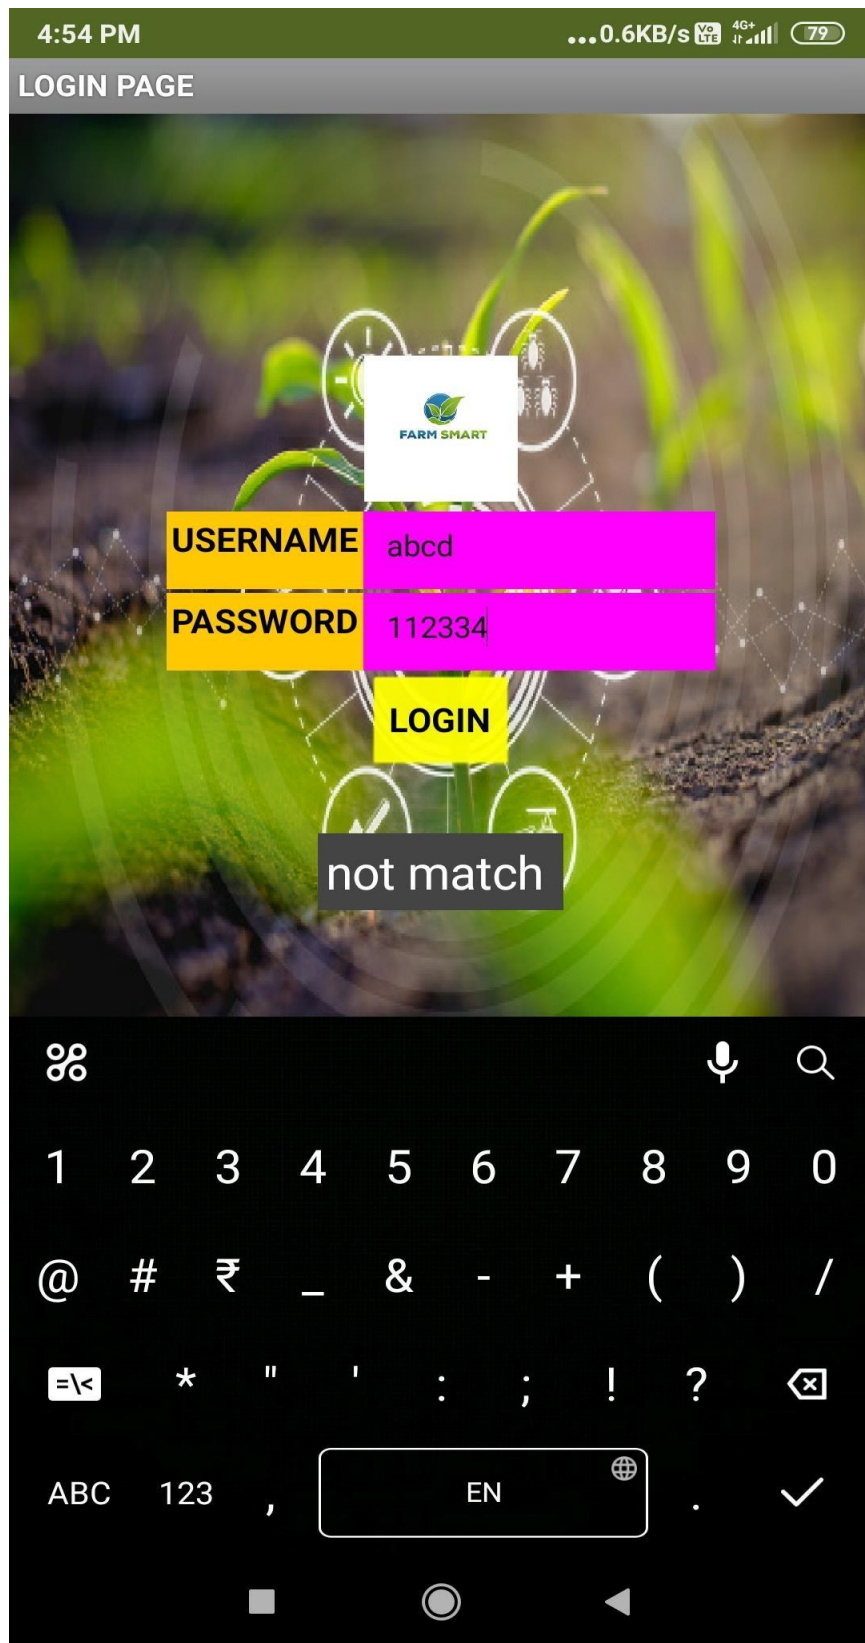

4:12 PM

3.4KB/s VoLTE 4G+ 84

## LOGIN PAGE

**When We enter incorrect password**

After successful login. The next page will be open. In that page we can see the real time temperature, humidity and soil moisture reading and motor ON and motor OFF control button also as shown below.

**Conclusion:** we are successfully created the IOT enabled smart farming application.
